Academic Year 2021 – 22: Semester 1

Mid Semester Test-1 (Type of the Test)

Information Technology

R21 Batch & Regular Mode of Examinations

Year: PUC – 2 | **Date of Examination: 14th April, 2022**

Time: 60 Minutes | **Max Marks: 20**

4X5 Marks= 20

The Question Paper consists of 8 questions. Answer any four questions.

Each Question Carries 5 Marks and may have 'A', 'B' ,'C' as three sub-questions

Note: Usage of any data/ scientific calculator/code book may be permitted/not permitted (if any)

---

1. What is HTML? Explain about basics tags in HTML with suitable examples(any five)?

or

2. Design your own website with designing background color, inserting images and font format styles with headings and by using all HTML formatting tags? (each option carries 1 mark)

3. What is an attribute? Explain about different types of attributes (any two Global attributes and 3 Generic attributes) with example?

or

4. Explain about
   d. HTML elements and tags? 2 M
   e. Container and non-container tags? 2M
   f. Write HTML code to insert audio files? 1M

5. What is a list? Explain about unordered and nested list with suitable examples? (1+2+2)

or

6. Write the HTML code for the below list?

Subject Code: E211 – English III

R21 Batch - Regular Mode of Examinations

Batch: R21 P2S1 | Date: 15 Nov, 2022

Time: 60 Minutes | Max Marks: 20

---

1. Comprehend the given passage and answer the following questions. **5M**

It was a normal day. My school let us out early. While I was on my way home, I saw a street dog being beaten brutally by a man. It seemed like he was venting his frustration on it; the poor dog cried in pain; without defending itself, unlike most dogs. My heart was overwhelmed by the dog's pitiful face.

At that very moment, I thought of rescuing the dog, but my courage failed me at the sight of the gigantic man who seemed to possess humongous strength. Reluctantly, I left the place, feeling I could do nothing.

Even though I left the area, the visuals of that pathetic incident were still in front of my eyes. I could not sleep that night; thoughts about the dog kept me awake.

When I was heading to school the next day, I saw the same dog; limping around the street as it got seriously injured; due to the previous day's attack. I felt very sorry for that dog and for being helpless. I continued my way to school as I was already late.

That day, after my school, I went on to search for the dog. To my surprise, I could find it nowhere.

Once again, I regretted not attempting to save the dog. Today, given a chance to travel back in time, I would immediately call the police or a local animal welfare organization to ensure the dog was unharmed. I would request they provide shelters for stray dogs. I hope the poor doggy is safe somewhere in this big world.

By P. Krishna Koushik, RGUKT, RK Valley.

1. What does the passage talk about?

A. About a badly beaten dog.

Scanned by TapScanner

B. Narrators desire to save the dog.

C. A desire to travel in time.

D. None of the above.

2. What does the word overwhelm mean in the passage?

A. to be encouraged

B. to be crushed

C. to surrender

D. all the above

3. The most appropriate word for the sentence 'I could find it nowhere' would be

_____.

A. missing

B. kidnapped

C. killed

D. all the above

4. How did the narrator feel when he saw the dog the next day?

A. overjoyed

B. relieved

C. guilty

D. none

5. What would you do if you were the narrator? **5M**

OR

2. Choose the correct answer from the three alternatives given below each question. **5M**

1. Bacon's essay entitled 'Of Studies' is a passage to be:

(i) chewed and digested

(ii) read with main points

(iii) studied thoroughly

2. One who makes too much use of his readings for conversational purposes makes:

(i) things haphazard

Scanned by TapScanner

(ii) vain display of his learnings

(iii) proper use of books

3. One should take extracts from:

(i) books of high value

(ii) meaner sort of books

(iii) remedial books

4. Books worth a closer and thorough reading:

(i) are smaller in number

(ii) are written by famous writers

(iii) are text books

5. Logic and rhetoric develops:

(i) man's debating powers

(ii) man's thinking power

(iii) man's power to interact

3. Annotate the following sentence 'Reading maketh a full man; conference a ready man; and writing an exact man. 5M

OR

4. What does the poet reveal through his poem 'On His Having Arrived at the Age of Twenty-Three'? 5M

5. Write the contexts where simple present form is used with examples. 5M

OR

6. Follow the instructions given in the brackets. 5M

1. They perfect nature. (change into a negative sentence)

2. History helps us to enhance our wisdom. (change into a question)

3. Caco (add a suffix)

4. Semblance (write its meaning)

Scanned by TapScanner

5. On His Having Arrived at the Age of Twenty -Three (write rhyme scheme of the poem)

6. Egomaniac (write meaning)

7. affectation (frame a sentence)

8. photographer (write the number of syllables)

9. pity (write the singular form of the verb)

10. extract (write noun form of the word)

7. Imagine you are selected for an interview to get a job in a software company. Write a dialogue between yourself and the interviewer. **5M**

OR

8. Study the given pie chart carefully and write a few sentences on the time spent on smartphones by the youth of India. **5M**

1. Games 2. Social Networking 3. Utilities 4. Music & Videos 5. News

Academic Year 2021 – 22:

PUC-2(R20-Regular)

Semester 1

Mid -1

Year: 2021 – 22 | **Date of Examination: 18 Apr, 2022**

Time:120 Minutes | **Max Marks: 40**

4X10 Marks= 40

The Question Paper consists of 8 questions. Answer any four questions.

Each Question Carries 10 Marks

1. A) Find $\int \frac{2\cos^3 x+3\sin^3 x}{\cos^2 x\sin^2 x}dx$. (5M)

   B) Evaluate $\int \frac{(x^4-x)^{\frac{1}{4}}}{x^5}dx$ (5M)

2. A) Solid lies between planes perpendicular to the x-axis at x= -2 and x=2. The cross sections of the solid perpendicular to the axis between these planes are vertical squares whose base edge run from the semicircle $y=-\sqrt{9-x^2}$ to the semicircle $y=\sqrt{9-x^2}$. The height of the square at x is $2\sqrt{9-x^2}$. Estimate the volume of the solid using approximation by finite sums. Estimate the true volume and find the error percentage(7M). $S_8 =$

   B) Evaluate $\sum_{k=1}^{7}\{k(k^2+2k-1)+3\}$(3M)

3. A) Use a definite integral to find the area of the region between the curves $y=3x^2$ and the x-axis on the interval [0,b].(6M)

   B) Use Max-Min inequality to find upper and lower bounds for the integral of

   $\int_0^1 \frac{1}{(1+x^2)}dx$ (4M).

4. (A)Let $f(x)=\sin x$ be a function defined over the interval $[-\pi,\pi]$.Partition the interval into 4 subintervals of equal length. Then compute the Riemann sum $\sum_{k=1}^{4} f(c_k)\Delta x_k$. Given that c_k is the

   (I) Right hand endpoint (II) Midpoint of the kth subinterval.(5M)

   B) Find the area of the shaded region in the given graph

The Question Paper consists of 8 questions as internal choice. Answer four questions.

Each Question Carries 5 Marks and may have 'A', 'B' as two sub-questions

Note: Usage of any scientific calculator is be permitted

***

1. Define Transverse waves and Derive an expression for speed of transverse waves in string? (1 + 4M)

Or

2. What is closed pipe and show that the ratios of harmonic frequencies in a closed pipe are 1:3:5…? An open organic pipe has length 3 cm find the fundamental and third harmonic frequency of vibration of this pipe. Assume speed of sound in air is 342m/s? (3+ 2)

3. Define Beats and derive equation of Beat frequency?
   b) The transverse displacement of wave is givenby $y(x,t) = 0.06 \sin\frac{2\pi x}{3} \cos(120\pi t)$ where x and y are in meter and t is in seconds. does the wave represents travelling wave or standing wave, and also find wave speed? (2.5+2.5)

Or

4. Define Doppler effect and derive expression of apparent frequency of sound wave when source is moving towards stationary observer (5M)

5. A) Write about coulomb's law
   B) Four equal charges of 2×10^{-6} C each are fixed at four corner of a square of side 4cm.Find the force experienced on one charge by three other charges ?

Or

6. Explain Gauss law and derive an expression for the electric field due to an infinite plane sheet.

7. Derive an expression for the electric field due to a dipole along axial line and equatorial line. (2.5 + 2.5 M)

Or

8. Derive an expression for electric field due to line of charges. (by integration method)

Time: 60 min Max. marks: 20 M

Paper consists of 4 units. Answer one full question from each unit. Each Question Carries 5 Marks and may have 'A', 'B' as two sub-questions 4X5M = 20 M

---

1. Consider the standard reaction potentials are: -0.25 V for $Ni^{2+}(aq) + 2e \rightarrow Ni(s)$ and +0.80 V for $Ag^{+}(aq) + e \rightarrow Ag(s)$ (5M)
   Describe the cell with neat diagram, show the anode, cathode
   Indicate the direction of electricity and direction of electrons and
   IUPAC representation of the cell based on the above data:
   Calculate E0cell; write anode and cathode-half reactions, over all cell reaction.

(OR)

2. a) State and explain Faraday's First law of electrolysis (2 M)
   b) An electric current of 0.8 ampere was passed through acidulated water for 60 minutes. Calculate the volume of hydrogen produced at STP. (Z for hydrogen = 0.00001) (3 M)
3. a). Define the terms specific, equivalent and molar conductance of an electrolyte? Also write the formulas and units (3M)
   b). Explain the effect of dilution on specific conductance and molar conductance (2 M)

(OR)

4. State and explain Kohlraush law? The conductivity of pure water 298 K is 0.554×10^{-7} ohm^{-1} cm^{-1}. Calculate the degree of dissociation and the ionic product of water at 298 K
   Given that $\Lambda_{\infty} = \left[\lambda_{H^+} + \lambda_{OH^-}\right] = 548.3\ ohm^{-1}\ cm^{2}\ g\ eq^{-1}$
5. Briefly discuss about the classification of solids on the basis of intermolecular forces of attractions. (5 M)

(OR)

6. A. The density of iron crystal is 7.86gm/c.c. The volume of unit cell is 24×10^{-24} cm^3. To what type of crystal does iron belongs, find it. (At. Wt=56)
   B. The standard electrode potentials;
   $Fe^{+3} + 3e^- \rightarrow Fe$, $E^0 = -0.036$ volt
   $Fe^{+2} + 2e^- \rightarrow Fe$, $E^0 = -0.440$ volt
   The standard electrode potential E^0 for $Fe^{+3} + e^- \rightarrow Fe^{2+}$ is
7. a). Derive Bragg's equation. X rays of wavelength 0.164 nm strike a magnesium crystal; the rays are reflected at an angle of 30°. Assuming that $n = 1$, calculate the spacing between the planes of magnesium atoms (in pm) that is responsible for this angle of reflection (5 M)

(OR)

8. The equivalent conductivity of 0.01 N NH_4OH solutions is 9.33 ohm^{-1} cm^2. The equivalent conductivities at infinite dilution of NH_4Cl, NaOH and NaCl are 125.6, 221.8 and 109.1 ohm^{-1} cm^2 respectively. Determine the percentage dissociation and also calculate the pH of the solution. (5M)
